experience

## Real Broker LLC JAN 2018 - NOW

### Full Stack Developer

Redesigned and developed the UI for our properties search from scratch, implementing caching with RxJS store, and service workers to eliminate repeat network requests and enable offline use.

Migrated our agent's website platform from Ruby on Rails server to Angular application with Rails backend, developing new UI system with reusable/modular components and refactoring our lead capture system.

## Black Swan Data JAN 2016 - JAN 2017

### Product Design & Development

Oversaw design and managed MVP development of iOS and Android applications. Designed and prototyped functional mockups for development team and clients. Collaborated with data scientists to develop new tools for marketing insights.

## Freelance Designer MAY 2015 - NOW

### Web Design & Development

Managed design and development of web/print materials for clients including Redbull Arts NYC, Storefront for Art and Architecture, Jordan Wolfson, Justin Lowe and Jonah Freeman.

education

## App Academy NOV 2017

### Software Development

Intensive full-stack web-development program focusing on object oriented programming, test driven development, and pair programming.

## Pratt Institute MAY 2015

### BFA: Communication Design
